

Support for Application for EU Settlement

<https://citizensrightsproject.org/> is an organisation that is supporting families with their EU settled status applications. The website is available in many different EU languages as you can see below. Some families may need support to apply, especially families who don't speak good English or have limited literacy (the latter of which may even need support to even contact the organisation).

This link takes you to their 1-2-1 support section:
